

THE TDX[®] SP2 POWERCHAIR RANGE

with LiNX Technology

SMART TECHNOLOGY: REDEFINING MOBILITY

LiNX[®]

Everyday smart solutions

Innovation, technology and control are at the heart of this versatile range of centre wheel drive powerchairs to offer a mobility solution for everyone. Featuring advanced technology combined with a striking iconic design, our TDX® SP2 range is built to withstand the everyday demands you would expect in a powerchair.

Discover our range.....

Performance engineered and finely tuned

Our power-base has evolved into the sleek, smart drive you see today. With its distinctive aesthetics and compact footprint, delve beneath the contoured shrouds to discover an unrivalled drive performance.

Combine Stability Lock™ with our patented SureStep® suspension technology for exceptional stability and safety to give you a smooth and consistent ride over different surfaces day after day.

Iconic design that takes you anywhere

TDX® SP2's iconic design looks every bit as good as its performance, effortlessly manoeuvring you through daily activities. Featuring a true centre wheel drive, it easily turns on the spot without deviation to manoeuvre you into and out of those confined spaces.

Ultimate comfort designed around you

The range features our versatile and highly adaptable Modulite® seating system. Designed to provide maximum comfort and postural support, the system has easy, stepless adjustments to accommodate changes in your requirements.

Technology with a human touch

Our range of LiNX remotes have harnessed innovative, touchscreen technology to offer a fresh approach to powerchair controls. LiNX is all about connectivity, using Bluetooth simply connect to PCs, laptops and Macs - keeping you in touch with your world.

Whether you're looking for basic drive only functionality or the latest touchscreen remotes, our LiNX Technology offers you smart controls, in tune with your life.

A black powerchair with a light blue wheel rim is parked on a rocky beach. The background shows a sunset over the ocean with a rocky cliff in the distance. The chair is positioned on a paved area, and the scene is bathed in the warm, golden light of the setting sun.

Driving confidence whatever the conditions

We know that maintaining consistent speed when driving over uneven terrain, cambers or inclines can be difficult and often tiring.

With LiNX technology, the system's intelligence interprets, learns and adapts to your driving habits to ensure the drive of the powerchair is always optimised and well balanced.

This gives greater control and hold on slopes, no rollback, and greatly improved drive over soft surfaces at low speeds, like thick rugs or carpets.

A woman with long dark hair, wearing a blue t-shirt and jeans, is seated in a red TDX2 Ultra powerchair on a paved path. She is smiling and looking towards a young girl in a pink tutu who is captured mid-air in a dance leap. The background features a lush green lawn and several trees with white and pink blossoms, suggesting a park or garden setting. The overall scene is bright and cheerful.

TDX2 Ultra

Ultimate control, Ultimate comfort

Our elite, performance powerchair equipped with the advanced Ultra Low Maxx seating system is designed to offer maximum comfort and postural support for individuals with complex seating requirements.

Perfectly positioned

Customisable and modular to offer a range of seat width and depth options with a selection of backrests, headrests, armrests, hip and lateral supports providing optimum support and comfort.

Meet the Range – Up close and personal

- Drive range up to 26km*

* Dependent on chair configuration, terrain and individual use.

** 8km/h version.

Invacare LiNX is our insight inspired control system with advanced technology to provide a consistent driving experience. It's quick and simple to configure to suit your requirements.

Built-in Bluetooth

Both the REM400 and REM500 controls have built-in bluetooth which allows you to be connected to your computer, laptop and Mac or up to three devices simultaneously.

REM500

Key Features

- Display only version of REM400
- 3.5" interactive LCD touchscreen
- Allows alternative controls to be used to operate the powerchair.

Touchscreen Remote

The REM400 brings next generation technology to your Invacare powerchair through its impressive 3.5" colour touchscreen. This innovative remote is able to work alongside your physical and cognitive ability.

REM400

Key features

- Swipe or tap-only operation
- Direct access or step by step menu operation
- Adjustable brightness
- Configurable for left or right hand use
- Glove mode setting
- Screen lock out ability
- Profiles and functions accessible via the touchscreen, buttons or joystick
- Mouse mover with on touchscreen mouse clicks
- Programmable Toggle Switches available

Know before you go with

This innovative app has been designed for use with LiNX controls to provide you with a quick and easy way to see how your powerchair is performing. No more second guessing when you plan your day!

MyLiNX connects your smart device to your LiNX powerchair control using Bluetooth. Once connected it sends data direct from the powerchair controls to your smartphone to show clear and simple graphics for battery charge, number of charging cycles, total drive time and much more.

In addition, the app highlights any faults on the powerchair with suggestions to fix them. If any issue can not be resolved, you simply contact your Service Provider directly through the app.

Now you can drive with confidence with just a quick tap of the app!
